

Restaurant Tops

We manufacture a wide array of table tops which are supplied to large chains across North America as well as to the small local café or bar. Our tops can be used in cafeterias and for many different institutional needs as well.

Particle Board

This product is a low cost alternative used where the table will not be seen. It is not as durable as our other table tops and will be affected by moisture.

Edge Detail	Square
Corner Detail	Square
Finishes	Clear lacquer for protection only

MDF

This product is another low cost alternative used where the table will not be seen. It is not as durable as our other table tops and will be affected by moisture.

Edge Detail	Square
Corner Detail	Square
Finishes	Clear lacquer or paint

Plastic Laminate

Plastic laminate offers a durable table top at a reasonable cost. Available in many colours this product is supplied to many fast food restaurant chains and is used in cafeteria style settings.

Edge Detail	Square
Corner Detail	Square
Finishes	Many colours and patterns are available

Plastic Laminate C/W Solid Wood Edges

Applying solid wood edges to a Plastic Laminate top gives the appearance of a thicker table top and gives the option of a different edge and corner details.

Edge Detail	Can be radiused from a ¼” all the way up to a full bullnose.
Corner Detail	Corners can be radiused up to 1”.
Finishes	Many colours and patterns are available. Edges can be solid hard maple or oak and are finished with a clear catalyzed lacquer.

Perma Stone C/W Solid Wood Edges

This product is a solid cast epoxy that is extremely durable and can be supplied in just about any colour. The solid wood edges are the finishing touch.

Edge Detail	Can be radiused from a ¼” all the way up to a full bullnose.
Corner Detail	Corners can be radiused up to 1”.
Finishes	Many colours are available. Edges can be solid Hard Maple or Oak and are finished with a clear catalyzed lacquer or an epoxy.

Solid Wood Tops C/W Catalyzed Lacquer Finish

Our solid wood table tops are pleasing to the eye and can be supplied in many wood species including Maple, Oak, Cherry and more.

Edge Detail	Can be radiused from a ¼” all the way up to a full bullnose.
Corner Detail	Corners can be radiused up to 12”
Finishes	Available in different sheens. Stain can be applied under a lacquer to colour match your specifications.

Solid Wood C/W Perma Pox Finish

We call this the “Cadillac” of table tops that is supplied to restaurant chains and fine dining establishments throughout North America. This finish, although at a high price, will last for an extended period of time because of its chemical and water resistant properties. Use in the field has shown that the cost is offset by the years of service this top will provide.

Edge Detail	Can be radiused from a ¼” all the way up to a full bullnose.
Corner Detail	Corners can be radiused up to 12”.
Finishes	We offer our exclusive Perma Pox finish (Acid Resistant Epoxy) which will give years of service in a very busy environment. Stain can be applied under this finish to colour match to your specifications.
